Vscene

The only video collaboration platform designed for the education sector

Overcome limitations
Connecting teachers into classrooms over video anytime, anywhere

Equal Opportunity
Delivering equity in curriculum, regardless of geographical location

Facilitate Teamwork
Providing and supporting engaging, collaborative learning spaces

Tried and Tested
Used and trusted by over 2,000 education and research organisations

Developed for education and research, Vscene removes geographical barriers and enables remote conferencing and collaboration in education throughout schools, colleges, universities and research.

Vscene is the only global service designed to assist students, teachers, researchers and institutions to deliver collaborative teaching and learning. With our easy to use platform and HD capabilities, we're delivering real-time audio and video to millions of users in education and research globally, helping to facilitate immersive, humanised learning.

Vscene provides us with an all-in-one remote teaching solution. The platform enables real-time collaboration between universities, institutes, and remote students, removing the physical barrier from the class room experience.

Vscene

Access Anywhere

Vscene is a technology agnostic service, allowing you to teach a class or join a video call from every major browser, mobile device or room system as well as Skype for Business and Microsoft Teams.
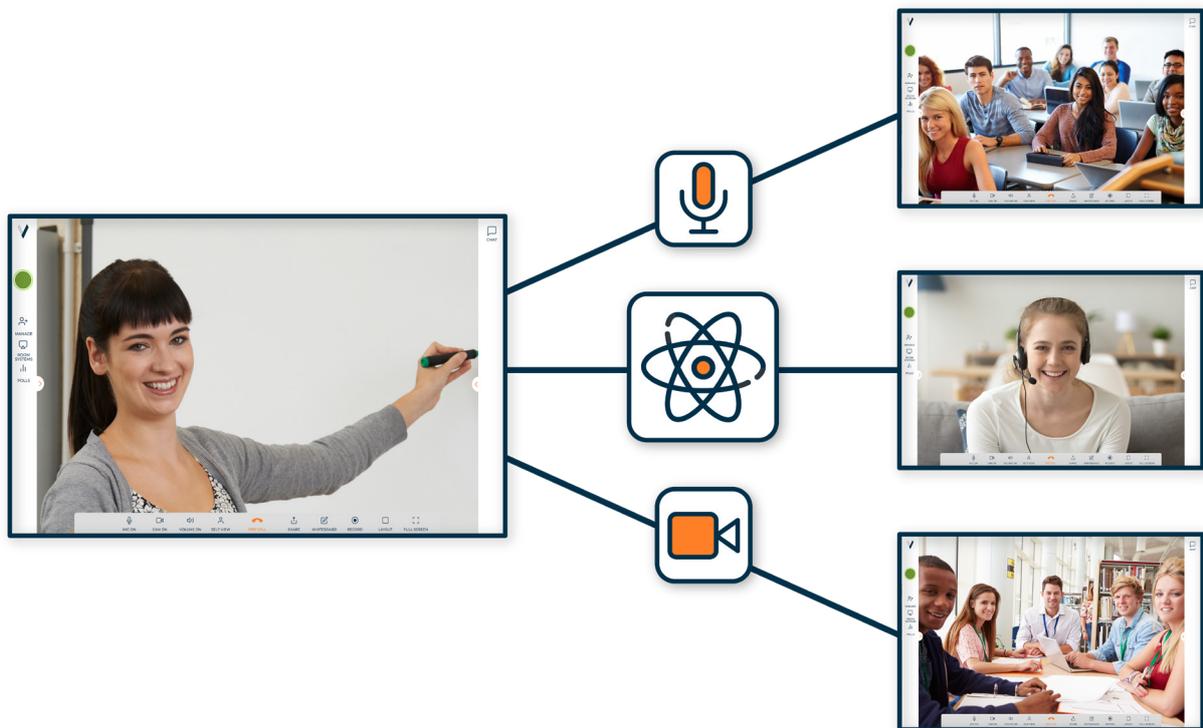

Real-time Collaboration Tools

Vscene provides real-time collaboration tools to facilitate engaging learning and teaching including moderation, public and private real-time chat, interactive whiteboards, polls and encrypted document sharing.

Your Security is our Priority

Vscene users benefit from a highly secure platform, using end to end encryption across UK hosted servers in government approved data centres on the Janet and SWAN networks. The Vscene cloud is ISO27001, Cyber Essentials Plus and GDPR accredited.

HD Recording and Webcasting

Vscene provides secure, unlimited HD recording and webcasting of classes and meeting. Ensuring both real-time inclusion and off-line replay for students and staff regardless of your geographical location or the device you are using.

Vscene is a service from Ajenta

Ajenta provide innovative collaboration products to more than 10,000 education, healthcare and research institutions in the UK and Europe from their head office in Edinburgh, Scotland. For more information visit us at www.ajenta.net
